HIGH PERFORMANCE POLYUREA FLOOR JOINT FILLER & JOINT REPAIR MATERIAL

Don't despair about your joint filler repair... Install Euclid Chemical's QWIKjoint 300 for rapid, rugged, reliable results!

EUCO QWIKjoint 300 is the fast-setting, semi-rigid polyurea joint filler and crack repair material that is specially designed for rapid strength development and excellent durability. QWIKjoint 300 delivers exceptional service, is the perfect filler for wide and deep joints, and features the following advantages:

- Fast setting formula reduces costly downtime
- Less staining potential to adjacent concrete due to overfilling
- Multifunctional
 - ideal filler for control and construction joints
 - excellent for crack repair or new construction
- Cures in temperatures as low as -20°F (-29°C)
- Easily handles heavy loads and wheel traffic virtually eliminating spalled joint edges
- USDA compliant
- Meets stringent ACI 302 performance recommendations for control & construction joints

Take control of your next project; insist on Euclid Chemical's QWIKjoint 300, the perfect filler for new construction or existing joint repairs.
