

METAL FX

METALLIC EFFECT EPOXY SYSTEM

METAL FX is an interior epoxy-flooring system that is as beautiful as it is durable. Pre-measured, metallic-look, light-reflective pigments are mixed with HIGH PERFORMANCE EPOXY to create a seamless, chemical-and-abrasion resistant floor with multi-dimensional effects. Available in 10 standard colors, pigments may be applied alone, mixed, or applied simultaneously for vivid, one-of-a-kind flooring. Special application techniques will manipulate the pigments, producing dramatic venues for your facility. METAL FX is low odor and may be top-coated with epoxy or urethane for additional protection and ease of maintenance.

CUSTOMER SUPPORT

- Technical Support – Available for product selection, application questions.
- Product Assistance – Locate a contractor or distributor. Support literature and in-depth written application instructions.
- Field Specialists – Increte-trained field specialists provide consultations and recommendations.
- Design Consultation – Complete with showroom and training facility.
- Seminars – 2-day seminars include classroom instruction on project estimating, marketing and sales tactics to grow your business all year long with hands-on product training (available in Spanish). On-site distributor training and webinars by request are also available.

APPLICATIONS

- Medical facilities
- Arcades
- Garages & service areas

PRODUCT SUPPORT

- Specification assistance
- CAD details
- Design consultation
- Color selection assistance
- R&D laboratories
- Applied samples
- USDA compliant
- Engineered-systems approach

METAL FX

METAL FX metallic pigments are pre-measured and pre-packaged by weight. When added to HIGH PERFORMANCE EPOXY and applied to any interior concrete floor, the result is a dramatic yet durable surface. Once applied, METAL FX can be clear-coated with a polyurethane or water-based epoxy for added protection against scuffing, abrasion or UV deterioration. Use with other coating materials will produce varied effects and should be tested prior to any application.

STANDARD COLORS

Available in 10 standard colors.

1:1 COMBINATION COLORS

Unique colors created by combining equal parts of standard colors.

NOTE: The printed color chart is for reference purposes only. Euclid Chemical recommends choosing colors from actual test samples.
