STONE ESSENCE
SEMI-TRANSPARENT STAIN

APPLICATIONS
- Patios
- Pool decks
- Walkways
- Garages
- Driveways
- Basements

STONE ESSENCE is a concentrated, water-based coloring system that is used to transform indoor or outdoor, plain gray concrete into deep, rich, colored surfaces. Available in 20 standard colors, multiple colors may be combined or layered for added mottling effects. STONE ESSENCE semi-transparent stain will not chip, peel, crack or fade over time, and for greater protection should be top-coated with solvent or water-based sealers, urethane, or epoxy. Because STONE ESSENCE is odorless, it is the perfect alternative to traditional acid stains and may be applied in occupied buildings. Application is easy: Dilute with water, mix and spray-apply.

COMPLIMENTARY SYSTEMS

Micro Toppings – When your concrete slab isn’t quite up to par, Increte Systems has a family of micro toppings engineered specifically to provide a new “canvas” for your stains. MICROCRETE, RENOVATE, and SPRAY DECK FINE are just a few examples of our complete line of superior concrete resurfacing products.

Sealers and Coatings – Euclid Chemical and Increte Systems offer a variety of coatings, both for interior and exterior use, to protect and enhance your beautiful stained surface. Choose from water and solvent based acrylic sealers, to high performance epoxies and urethane coatings, and even to the newest polyaspartic coatings . . . a product for every budget and every application.
