

QUARTZ EP

QUARTZ EPOXY SYSTEM

QUARTZ EP is a system of colored-sand that is broadcast into HIGH PERFORMANCE EPOXY resulting in an attractive, seamless floor with chemical-and-abrasion resistance. Depending upon the application, this decorative, aesthetically-pleasing surface can have positive footing or a smooth, high-gloss finish. For additional protection, urethane may be used as a top coat for greater wear resistance and UV stability. QUARTZ EP is available in 11 standard colors, but may be custom blended to create unique colors. This interior floor is low-maintenance, has a long-term service life, and in many cases is a good alternative to trowel-applied systems.

CUSTOMER SUPPORT

- Technical Support – Available for product selection, application questions.
- Product Assistance – Locate a contractor or distributor. Support literature and in-depth written application instructions.
- Field Specialists – Increte-trained field specialists provide consultations and recommendations.
- Design Consultation – Complete with showroom and training facility.
- Seminars – 2-day seminars include classroom instruction on project estimating, marketing and sales tactics to grow your business all year long with hands-on product training (available in Spanish). On-site distributor training and webinars by request are also available.
