EZ EXPOSE is a water-based, concrete surface retarder designed to create exposed-aggregate finishes with consistency and ease. EZ EXPOSE is formulated in four grades that result in different etch levels from a fine sandblast up to a full 1-in (2.5 cm) depth that will expose larger decorative stone. For best results, all grades are slightly colored so that application can be monitored visually to assure even and total coverage.

CUSTOMER SUPPORT
- Technical Support — Available for product selection, application questions.
- Product Assistance — Locate a contractor or distributor. Support literature and in-depth written application instructions.
- Field Specialists — Increte-trained field specialists provide consultations and recommendations.
- Design Consultation — Complete with showroom and training facility.
- Seminars — 2-day seminars include classroom instruction on project estimating, marketing and sales tactics to grow your business all year long with hands-on product training (available in Spanish). On-site distributor training and webinars by request are also available.
- Trade shows — Industry events, expos and conferences offering industry-related instruction.

APPLICATIONS
- Integrally-colored concrete
- Decorative exposed aggregate
- Micro-etch, sandblast effect
- Large exposed stone
- Embedded exposed crushed shell
- Flatwork or precast concrete

PRODUCT SUPPORT
- Specification assistance
- CAD details
- Design consultation
- Color selection assistance
- R&D laboratories
- Applied samples
- USDA Compliant
- Engineered-systems approach
**COLOR COMBINATIONS**

35 standard integral colors can be utilized to pre-color concrete offering limitless design possibilities.

**EXPOSURE LEVELS**

Four different grades provide consistent results to meet desired levels of aggregate exposure.

**NOTE:** The printed color chart is for reference purposes only. Euclid Chemical recommends choosing colors from actual test samples.
