

VIBRA-STAIN/ VIBRA-STAIN SB

CONCENTRATED DYES FOR CONCRETE

APPLICATIONS

- Polished floors
- Interior use
- Restaurants
- Walkways
- Retail floors
- Hotels
- Lobbies
- Conference rooms

PRODUCT SUPPORT

- Specification assistance
- CAD details
- Design consultation
- Color selection assistance
- R&D laboratories
- Applied samples
- Non-acid based
- Engineered-systems approach

VIBRA-STAIN and VIBRA-STAIN SB are the specially-formulated dye components of the PRO-POLISH SYSTEM that add vibrant color to interior, polished concrete. Vibra-Stain may be diluted with water or alcohol, whereas Vibra-Stain SB's powdered metal-complex dyes are specially formulated to be diluted with acetone. Both solutions create a deep-penetrating, semi-transparent color for concrete and overlay surfaces that never chip or peel. With 20 standard vivid colors available, the dyes may be diluted to achieve a variety of hues, and multiple colors may be combined to offer a limitless palette of possibilities. Vibra-Stain/Vibra-Stain SB can be applied by spray, brush, sponge or roller, and the surface can be coated several times for a deeper, richer color. Finally, the stained surface is either polished or sealed to protect and enhance the full effect of the stain.

CUSTOMER SUPPORT

- Technical Support – Available for product selection, application questions.
- Product Assistance – Locate a contractor or distributor. Support literature and in-depth written application instructions.
- Field Specialists – Increte-trained field specialists provide consultations and recommendations.
- Design Consultation – Complete with showroom and training facility.
- Seminars – 2-day seminars include classroom instruction on project estimating, marketing and sales tactics to grow your business all year long with hands-on product training (available in Spanish). On-site distributor training and webinars by request are also available.
