

COMPREHENSIVE PROTECTION AND RESTORATION BUILDING FAÇADE SOLUTIONS

PRODUCT SOLUTIONS

- Vertical Concrete Repair Systems
- Smoothing Mortars
- Stucco Finishes
- Protective Sealers
- Coatings and Stains
- Urethane Sealants
- Mortar Colors

BENEFITS OF FAÇADE PROTECTION AND RESTORATION

- Extended Building Lifespan
- Cost Savings
- Safety
- Energy Efficiency
- Reduced Maintenance Costs
- Improved Aesthetic Appeal
- Enhanced Property Value
- Preservation of Historical and Architectural Value

Concrete elements are a hallmark of modern building exteriors, offering both aesthetic appeal and structural longevity. However, over time, weather and environmental factors can lead to the development of cracks and voids, compromising the integrity of the building envelope.

Repairing and protecting facades is crucial for maintaining structural integrity and aesthetic value. Facades are exposed to harsh weather, pollutants, and wear, leading to deterioration. Euclid Chemical's engineered products restore and fortify facades against future damage, meeting safety standards and enhancing visual appeal with options like stucco finishes and semi-transparent stains. Investing in these solutions extends building lifespan, improves curb appeal, and maintains property value.

Euclid Chemical offers a range of products for façade protection, repair, and restoration, including concrete repair mortars, penetrating sealers, urethane sealants, and protective coatings. These solutions ensure quick return to service, improved aesthetics, and extended service life, preserving property value and protecting tenants.

INNOVATIVE SOLUTIONS FOR FAÇADE RESTORATION & PROTECTION

- ▶ **Cutting-edge concrete repair products** designed to restore façades and protect structural steel, enhancing longevity while meeting safety and load-carrying standards
- ▶ **Cementitious finishing compounds** that fill and smooth vertical concrete surfaces
- ▶ **Stucco finishes** that provide a textured, multi-dimensional appearance
- ▶ **Protective and decorative sealers and coatings** that are neighbor-friendly, low odor, eco-conscious
- ▶ **Quick-curing urethane sealants** that provide lasting protection against water and debris ingress
- ▶ **Mortar colors** that enhance the beauty and value of brick, stone, and colored concrete block
- ▶ **Semi-transparent concrete stains** used to enhance the visual interest and depth of a façade while preserving its natural texture

COMPREHENSIVE PROTECTION AND RESTORATION BUILDING FAÇADE SOLUTIONS

SINGLE-SOURCE MANUFACTURER

Euclid Chemical manufactures a full line of concrete repair products, water repellents, coatings, sealants, and decorative concrete products – making it truly the best option for protection and restoration. With over a hundred years of offering high quality products into the concrete and concrete restoration market, Euclid Chemical is the proven choice when it comes to façade solutions.

REPAIR

EucoRepair V100

Quick-setting, low shrinkage repair mortar formulated with unique polymers and fiber reinforcement for trowel applied vertical concrete repairs requiring highest performance and structural strength.

Eucopatch

Single-component, rapid-setting, repair mortar designed for the reconstruction of damaged vertical and overhead concrete and masonry structures. The subtle color of Eucopatch closely resembles aged, sun-bleached concrete.

Tammscrete and Eucrepair Smooth

Single-component, polymer-modified, cementitious mortars used to give a smooth finish vertical concrete surfaces with minor imperfections.

Tamms Stucco Finish

Weatherproofs vertical concrete with a tough, cement based coat designed for interior or exterior applications.

PROTECT

Chemstop WB Regular & Heavy Duty

Water-based siloxane/silane water repellents that provide water and salt repellency while maintaining the surface color, texture, and breathability.

Tammolastic

Elastomeric flexible coating, that will waterproof, bridge hairline cracks, and enhance the aesthetic appearance of concrete, stucco, and masonry surfaces.

Tammscoat

High build, pigmented, water based acrylic coating used to protect and decorate masonry and concrete surfaces.

Eucolastic 1NS

Single component, non-sag, polyurethane sealant used to seal control & expansion joints, precast concrete panels, EIFS, and window & door perimeters.

ENHANCE

Increte Color-Crete Mortar Color

Transforms plain gray mortar joints into workable artistic materials that increase design options, enhance the beauty and value of a building façade.

Increte Stone Essence

Concentrated, water-based coloring system that creates a semi-transparent, natural looking concrete surface with enhanced color.
