CLEAR SEAL NATURAL
Decorative Concrete Water-Based Color Enhancing Sealer

DESCRIPTION
CLEAR SEAL NATURAL is a ready-to-use, water-based, silicone water repellent sealer. CLEAR SEAL NATURAL works by impregnating the surface forming a hydrophobic barrier with excellent water beading characteristics that protects Concrete, pavers, and stone. CLEAR SEAL NATURAL is not a film-forming topical sealer. CLEAR SEAL NATURAL is breathable and preserves the natural look of the surface, without adding gloss but nicely enhancing the color of the substrate.

PRIMARY APPLICATIONS
- Stamped Concrete
- Decorative concrete
- Integral colored concrete
- Natural & cultured stone
- Pavers & precast units
- Driveways & sidewalks
- Patios
- Walls

FEATURES/BENEFITS
- Color enhancing
- Excellent water beading
- Not a film-forming sealer
- Natural look - very low gloss
- Good tire marking resistance
- Excellent blush resistance
- Non-yellowing
- Low VOC - low odor
- Can contribute to LEED points (EQ Credit 4.2)

TECHNICAL INFORMATION
Material Properties at 75°F (24°C), 50% Relative Humidity

Appearance: CLEAR SEAL NATURAL is a white, opaque liquid. After application and drying, the product is clear, and will not add gloss like a topical, film-forming coating. CLEAR SEAL NATURAL may slightly darken some substrates. A small test area is strongly recommended to confirm appearance prior to beginning full application.

PACKAGING
CLEAR SEAL NATURAL is packaged in 5 gal (18.9 L) pails and in cases of 1 gal (3.8 L) jugs.

SHELF LIFE
1 year in original, unopened package.
**Coverage**

First Coat: 150 to 350 ft²/gal (3.7 to 8.6 m²/L)  
Second Coat: 200 to 400 ft²/gal (4.9 to 9.8 m²/L)  
Note: Coverage rates are approximate. Actual coverage depends on temperature, texture, and substrate porosity.

**Directions for Use**

**Surface Preparation:** The surface must be structurally sound, clean and free of curing compounds, sealers, grease, oil, dust, soil, and other contaminants. New concrete must be at least 7 days old. Prior to application, surface defects, voids, cracks, and joints should be properly treated and/or repaired. Allow surface to dry prior to application.  

**Mixing:** Stir/agitate CLEAR SEAL NATURAL prior to application.  

**Application:** Apply CLEAR SEAL NATURAL in an even, continuous film by sprayer, short nap roller, brush, or a combination of the above. Apply the second coat of CLEAR SEAL NATURAL using a “wet on wet” method, before the first coat has dried. Typically, the second coat will need to be applied within 10 to 20 minutes of applying the first coat, although drying times will vary with weather conditions. Re-distribute or soak up puddles of CLEAR SEAL NATURAL that have not penetrated into the substrate after 10 to 20 minutes. Allowing puddles to dry on surface may lead to higher gloss and tackiness in those areas.

**Clean-Up**

Clean tools and spray equipment immediately with water. Clean spills, drips, or overspray with water while still wet. Hardened/dried CLEAR SEAL NATURAL will require chemical stripping or mechanical abrasion for removal.

**Precautions/Limitations**

- Store CLEAR SEAL NATURAL indoors, protected from moisture, at temperatures between 50°F and 90°F (10°C and 32°C)  
- Surface and ambient temperature during coating applications should be between 45°F and 105°F (7°C and 41°C)  
- Do not apply CLEAR SEAL NATURAL to frost-filled or frozen substrates  
- Do not apply CLEAR SEAL NATURAL if rain or heavy fog is expected within 4 hours of application  
- Material temperatures should be at least 50°F (10°C) and rising  
- Do not thin CLEAR SEAL NATURAL  
- Application of a test area is strongly recommended to confirm final appearance and texture of the sealer with the end user  
- CLEAR SEAL NATURAL will enhance color and darken substrates. However, color enhancement may be lower when applying CLEAR SEAL NATURAL to polymer/latex-modified cementitous mortars and overlays.  
- CLEAR SEAL NATURAL does not cure concrete, and is not intended for use as a curing compound  
- Do not apply CLEAR SEAL NATURAL over existing curing compounds or curing & sealing compounds  
- Do not allow puddles of CLEAR SEAL NATURAL to dry on surface during application. If puddles are allowed to dry, the affected areas may have a higher gloss and tackiness.  
- Applying thicker than recommended, applying in cool/cold weather, or prolonged exposure to moisture (high humidity, rain, etc.) may result in the sealer remaining soft/wet/tacky for longer than the times found on this data sheet.  
- In all cases, consult the product Safety Data Sheet before use

**WARRANTY:** The Euclid Chemical Company (“Euclid”) solely and expressly warrants that its products shall be free from defects in materials and workmanship for one (1) year from the date of purchase. Unless authorized in writing by an officer of Euclid, no other representations or statements made by Euclid or its representatives, in writing or orally, shall alter this warranty. EUCLID MAKES NO WARRANTIES, IMPLIED OR OTHERWISE, AS TO THE MERCHANTABILITY OR FITNESS FOR ORDINARY OR PARTICULAR PURPOSES OF ITS PRODUCTS AND EXCLUDES THE SAME. If any Euclid product fails to conform with this warranty, Euclid will replace the product at no cost to Buyer. Replacement of any product shall be the sole and exclusive remedy available and buyer shall have no claim for incidental or consequential damages. Any warranty claim must be made within one (1) year from the date of the claimed breach. Euclid does not authorize anyone on its behalf to make any written or oral statements which in any way alter Euclid’s installation information or instructions in its product literature or on its packaging labels. Any installation of Euclid products which fails to conform with such installation information or instructions shall void this warranty. Product demonstrations, if any, are done for illustrative purposes only and do not constitute a warranty or warranty alteration of any kind. Buyer shall be solely responsible for determining the suitability of Euclid’s products for the Buyer’s intended purposes.
