COLOR-CRETE CURE WB
Water-Based Concrete Curing Compound

DESCRIPTION
COLOR-CRETE CURE WB is a VOC-compliant, water-based curing compound designed for architectural concrete surfaces. COLOR-CRETE CURE WB can be used on both interior and exterior applications and it meets the ASTM C-309 standards for a curing compound. COLOR-CRETE CURE WB is offered in clear or colored formulations.

PRIMARY APPLICATIONS
Concrete floors, walkways, driveways and integrally-colored concrete.

FEATURES/BENEFITS
- Easy to apply
- Ensures moisture retention in newly placed concrete
- Can be factory pre-colored
- Curing architectural surfaces

TECHNICAL INFORMATION
- Solids content: Approximately 15%
- VOC content: < 100 g/L
- Viscosity: 50 to 400 cps
- pH: 8.0 to 9.0
- Appearance: Milky white or colored liquid

PACKAGING
COLOR-CRETE CURE WB is available in 5 gal (18.9 L) pails. 55 Gal (208.2 L) drums are also available.

SHELF LIFE
2 Years in original, unopened containers.

COVERAGE
COLOR-CRETE CURE WB is applied at a rate of 150 to 200 ft²/gal (3.68 to 4.9 m²/L).
Coverage will vary from the above rates depending on surface texture, application method and texture.

SPECIFICATIONS/COMPLIANCES
- ASTM C 309, Type 1, Class A & B
- AASHTO M 148 Type 1
**Directions for Use**

This product is specially formulated for architectural horizontal and vertical concrete surfaces. It can be used over integrally-colored concrete and can be pigmented to match the color. COLOR-CRETE CURE WB can be used on driveways, walkways, patios, and pool decks.

Apply COLOR-CRETE CURE WB to freshly placed concrete in a thin, even application once the surface water glaze has disappeared. Apply COLOR-CRETE CURE WB with a low-pressure pump sprayer or short-napped roller at the recommended application rate.

**Clean-Up**

Clean up tools and equipment, overspray and drips with hot, soapy water. Once dry, product is very difficult to remove.

**Precautions/Limitations**

- Store between 50 to 90 °F (10 to 32 °C).
- Protect from freezing.
- Do not allow product to puddle on surface.
- Heavy applications, applying in cool or cold weather, or prolonged exposure to moisture may cause this product to have a milky appearance.
- Do not apply if rain or heavy fog is likely within 8 to 12 hours after application.
- Application temperature range is 45 to 95 °F (7 to 35 °C).
- Avoid excessive buildup. Heavy applications will lead to discoloration and poor product performance.
- For professional use only.
- In all cases, consult the SDS before use.
