VIBRA STAIN SB
ACETONE-SOLUBLE DYE FOR CONCRETE

DESCRIPTION

VIBRA-STAIN SB dyes are manufactured from blends of concentrated powdered-metallic dyes and are formulated for dilution with acetone. VIBRA-STAIN SB is designed for use on concrete that will be polished with liquid hardeners such as PRO-POLISH DENSIFIER.

FEATURES/BENEFITS

• Adds vibrant color to concrete.
• Not acid based.
• May be sprayed, brushed, sponged, or rolled on.
• VIBRA-STAIN SB colors are easily blended to create custom colors.
• Great for polished concrete.

PACKAGING

8 oz (236 mL) bottle for a 1 gal (3.78 L) dose.

SHELF LIFE

4 Years in original, unopened container.

COVERAGE

Coverage will vary with surface condition, porosity, application technique, dilution and desired effects. Average coverage is 250 to 400 ft²/gal (6.14 to 9.82 m²/L).

DIRECTIONS FOR USE

PREPARATION:
Protect all adjacent surfaces that will not be dyed. Use masking materials that will not be affected by the acetone. Apply a test patch of VIBRA-STAIN SB to verify color and reaction with slab.

Existing Concrete: Concrete surfaces must be structurally sound, free of loose or deteriorated concrete and free of dust, dirt, paint, efflorescence, oil and all other contaminants. Remove any loose material and any coatings such as paint, curing agents, and sealers. Increte’s Uni-Strip is perfect for removing old coatings. Degrease surface with Increte Systems GREASE-AWAY degreaser using 4-8 fl. Oz. of degreaser to one gallon of water then rinse.
Mechanically abrade the surface to achieve a surface profile equal to CSP 1-2 in accordance with ICRI Guideline 310.2. Properly clean profiled area.

New Concrete: New concrete must be cured at least 14 days prior to application of VIBRA-STAIN SB. Follow instructions for Existing Concrete

MIXING:
Add entire contents of bottle to 1 gal (3.8 L) of acetone and stir until completely dissolved. It is recommended to let the mix sit for at least 1 hour prior to application to guarantee complete dilution. Only apply using sprayers that are rated for use with acetone.
WARRANTY: The Euclid Chemical Company (“Euclid”) solely and expressly warrants that its products shall be free from defects in materials and workmanship for one (1) year from the date of purchase. Unless authorized in writing by an officer of Euclid, no other representations or statements made by Euclid or its representatives, in writing or orally, shall alter this warranty. EUCLID MAKES NO WARRANTIES, IMPLIED OR OTHERWISE, AS TO THE MERCHANTABILITY OR FITNESS FOR ORDINARY OR PARTICULAR PURPOSES OF ITS PRODUCTS AND EXCLUDES THE SAME. If any Euclid product fails to conform with this warranty, Euclid will replace the product at no cost to Buyer. Replacement of any product shall be the sole and exclusive remedy available and buyer shall have no claim for incidental or consequential damages. Any warranty claim must be made within one (1) year from the date of the claimed breach. Euclid does not authorize anyone on its behalf to make any written or oral statements which in any way alter Euclid’s installation information or instructions in its product literature or on its packaging labels. Any installation of Euclid products which fails to conform with such installation information or instructions shall void this warranty. Product demonstrations, if any, are done for illustrative purposes only and do not constitute a warranty or warranty alteration of any kind. Buyer shall be solely responsible for determining the suitability of Euclid’s products for the Buyer’s intended purposes.

Precautions/Limitations

• VIBRA-STAIN SB is for interior use only. Use only with adequate ventilation.
• Once dye is mixed with acetone, mixture will be highly flammable.
• Do not apply in areas where they will be exposed to direct sunlight. Fading may result from UV exposure.
• Excessive moisture in the slab may cause fading. An MVT rate of <5 lb/1000 ft\(^2\) (2.26 kg/92.90 m\(^2\)) in 24 hours is recommended.
• VIBRA-STAIN SB is translucent and will not cover defects or blemishes in concrete.
• Variations in concrete will affect how the surface accepts stain. Always perform a test spot prior to application to be sure the desired effect is possible.
• For professional use only
• In all cases, consult the Safety Data Sheet before use.
