Euclid Chemical admixtures have been used on numerous high-rise commercial and residential buildings over the years. These admixtures create extremely durable mixes with characteristics of very high strength, long slump life, high modulus of elasticity, high early strength, low heat and low shrinkage.

Located in Midtown, Manhattan, New York City, this 75-story skyscraper measures 1,004 ft (306 m) tall. A total of 45,000 yd$^3$ (13,716 m$^3$) in 5 different high strength SCC mixes at 6000 psi (41 MPa), 7000 psi (78 MPa), 8300 psi (57 MPa), 9800 psi (62 MPa), and 12,000 psi (83 MPa) were poured.
